

COGEN 3 is for YOU !

The Call for Full Scale Demonstration Projects (FSDPs): a real success !

On the closing day of 11 February 2003, over 30 FSDP proposals had been submitted from the whole ASEAN region.

These proposals are being evaluated based on four main criteria:

- Technical Merits
- Commercial Viability
- Environmental/National/Social Benefits
- Demonstration Value/Replicability

The result of the adjudication is expected to be announced in May 2003.

On-going Cogeneration Projects

In addition to the potential FSDPs being evaluated, COGEN 3 has been in contact and has started discussions with the developers of over 70 other on-going cogeneration projects. New projects are being identified every week. They are at different stages of development and are currently being followed-up by the COGEN 3 Team.

FREE Techno-Financial Analysis (TFA)

COGEN 3 has developed a techno-financial model which helps to make recommendation on the most appropriate technology solutions and to assess the financial viability of a cogeneration project. The evaluation is based on the energy requirements and fuel availability of a given industry.

Over the last six months, more than 30 ASEAN companies have already benefited from this FREE service and received their customised pre-investment reports.

If you like your next investment in a cogeneration project to be assessed, just contact us to get a TFA request form.

COGEN 3 - A Business Facilitator

COGEN 3 provides the following FREE services to the key cogeneration project stakeholders:

- For ASEAN End-users/Partners
 - Advise in project development and financing
 - Recommendation of most appropriate technologies and equipment suppliers
- For Developers, Investors and Financiers
 - Market information
 - Support in assessment of project bankability
- For EU Equipment Suppliers
 - Identification of business opportunities in South-East Asia
 - Identification of potential local partners
 - Sectoral information

Matchmaking service for EU and ASEAN companies

Looking for a partner in ASEAN or Europe ?

COGEN 3 can assist ASEAN and European companies in their search for partners such as manufacturers of cogeneration related equipment, EPC/turnkey contractors, suppliers of balance of plant, engineering companies and consultants. COGEN 3 can also facilitate your activities related to technology transfer, licensing or joint venture agreement.

2003 Cogeneration Weeks in ASEAN

COGEN 3 has great pleasure to announce the "2003 Cogeneration Weeks" that will take place in 7 ASEAN countries in May, June and July 2003.

The schedules are as follows:

Thailand	27 - 30 May	Vietnam	1 - 4 July
Indonesia	3 - 6 June	Singapore	<i>to be confirmed</i>
Malaysia	17 - 20 June	Cambodia	<i>to be confirmed</i>
Philippines	24 - 27 June		

The objectives of these weeks are to:

- Highlight the potential benefits of cogeneration: energy savings, financial and environmental issues
- Increase the awareness on policy issues that can improve the climate for implementation of cogeneration
- Build capacity on cogeneration project development (technical, financial and environmental analyses)

All Cogeneration Weeks will follow the same programme:

- National cogeneration policy seminar
- Training in cogeneration project development
- Site visit to cogeneration plants wherever applicable
- Individual consultations with cogeneration experts

The target groups for the Cogeneration Weeks are:

- National energy policy makers, energy and utility planners
- Cogeneration project developers and investors
- Financial institutions
- Equipment suppliers and service providers
- Consultants

Participation in the events is FREE, but participants must register at cogen3@cogen3.net or with their national COGEN 3 Team, contact details are available from www.cogen3.net
