

## Benefits of Cogeneration

- **Financial:** lower primary energy consumption, thus reducing energy bills
- **Strategic:** improved local and general security of energy supply
- **Environmental:** reduced local and global environmental pollution

## COGEN 3

The objective of COGEN 3 is to promote the use of **cogeneration** using biomass, coal or gas as fuel. This is achieved through partnerships between ASEAN industries and European equipment suppliers.

The programme is co-ordinated in ASEAN by the **Asian Institute of Technology (AIT)**, Bangkok, Thailand and in Europe by **Carl Bro International**, Sweden. COGEN 3 started its operation in January 2002 and will continue until December 2004.
